

## FAECES COLLECTION

**Please note: only one sample is required. If you have received specific instructions from your doctor, please follow those instructions.**

1. Place the flushable toilet liner into your toilet bowl.
2. Pass faeces onto the liner then half fill the brown faeces collection container using the scoop located in the lid.
3. If watery diarrhoea, pass into a clean unlined container and then pour into the brown faeces collection container.
4. Label the container with your surname, first name, date of birth, time and date of collection.
5. The specimen should preferably be stored in the refrigerator after collection and delivered to a collection centre or doctor's surgery as soon as possible.
