

Faeces collection

Note: Only one sample is required. If you have received specific instructions from your doctor, please follow those instructions.

1. Place the flushable toilet liner into your toilet bowl.
2. Pass faeces onto the liner then half fill the brown faeces collection container using the scoop located in the lid.
3. If watery diarrhoea, pass into a clean unlined container and then pour into the brown faeces collection container.
4. Ensure the container is labelled with your surname, first name, date of birth, gender, time and date of collection.
5. Specimen should preferably be refrigerated after collection and returned to the collection centre or doctor's surgery as soon as possible.
